

Sprint #3 Report

Dress To Impress, Team Wired, 11/19/2025

- Actions to stop doing:

Stop working on tasks that were not written in the Scrum board/sprint plan. Otherwise, the team is satisfied with our current progress.

- Actions to start doing

We should start communicating more and not worry about overcommunicating. For our meetings, we should also start off each meeting by saying what we have accomplished/struggled with (quick scrum), and then get into how we can help each other with errors rather than working silently. Meetings should be a place to update progress and then get each other on the same page.

- Actions to keep doing

We should keep updating progress in our Discord. Anytime we push/merge/make a pr, we should send a quick screen recording or an update of what has been done so every team member knows what has been completed. We should also keep making PRs and adding detailed comments on the PRs as well as adding detailed commit messages. We have started using LiveShare, we want to continue to use this tool to pair programs and work collaboratively on features that are difficult to implement.
