Sprint #4 Report
Dress To Impress, Team Wired, 12/02/2025

- Actions to stop doing:

  - Taking on oversized user stories that were difficult to finish in one sprint
  - Delaying demo videos or PR reviews until the last minuteInconsistent task estimation, leading to uneven workload across teammates

- Actions to start doing

  - Break large features into smaller tasks to improve predictability
  - Begin documentation updates earlier instead of at the end of each sprint
  - Set clearer ownership for features to avoid duplicated work
  - Add automated testing or linting to catch errors before merging

- Actions to keep doing

  - keep updating progress in our Discord
  - Anytime we push/merge/make a pr, we should send a quick screen recording or an update of what has been done so every team member knows what has been completed.
  - keep making PRs and adding detailed comments on the PRs as well as adding detailed commit messages.
  - Clear user stories with acceptance criteria

- Work completed/not completed

Completed:
  - **User Story 4.1** [CONTINUATION OF SPRINT 3] As a user, I want to be able to visualize my own clothing on myself so that I can try on clothes without going through the effort of putting them on
  - **User Story 4.2** As a user, I want to upload and save a body profile image so that I can view outfits on my body
  - **User Story 4.3** As a user, I want to save AI-generated outfits so that I can revisit them for inspiration
  - **User Story 4.4** As a user, I want to be able to view details of the outfits I generated
  - **User Story 4.5** As a user, I want to be able to log out and have all of my information saved despite not being on the app.
  - **User Story 4.6** As a user, I want to be able to create outfits complete outfits with different types of categories
  - **User Story 4.8** As a user I want to be able to edit item details so I can easily search for them

- **User Story 4.7** As a user I want to see more statistics/ai recommendations based on how often i wear clothes and outfits

Incomplete:
- none

Work Completion Rate:

Total number of user stories completed during prior sprint: 7
Total number of estimated ideal work hours completed during the prior sprint: 20
Total number of days during the prior sprint: 14
